

Communication Solutions for Construction

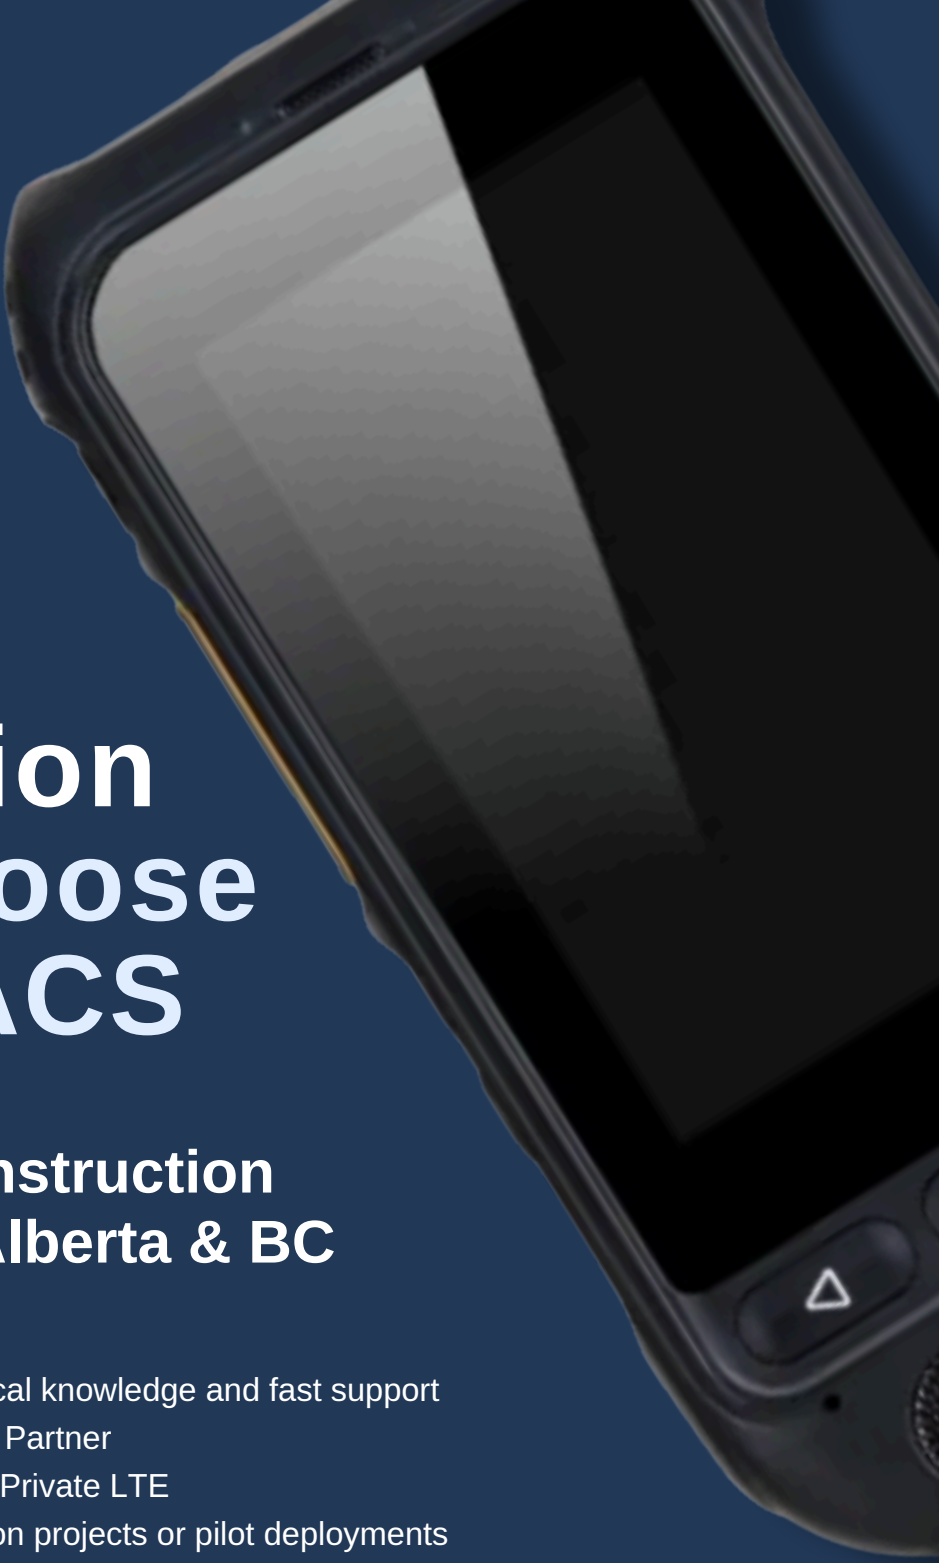

About Westcan ACS

Westcan ACS is a Western Canadian communications solutions provider and certified Motorola Solutions Channel Partner. We've been helping organizations across Alberta and British Columbia to stay connected with reliable, purpose-built communication systems, and we've made the construction and resource sectors a core part of what we do.

We understand that construction sites (especially in northern Alberta and BC) are dynamic, demanding environments. Crews move between zones. Projects operate far from infrastructure. Equipment is loud, conditions are harsh, and the margin for communication failure is zero. Clear, instant connectivity isn't a convenience, it's a safety essential.

We serve the Construction Market

Every project we work with gets local support, honest recommendations, and solutions that are actually built for how construction operates. We're not just supplying equipment, we're helping you build a communication system that performs from day one to project close-out.

Why Construction Teams Choose Westcan ACS

**We're trusted by Construction
Companies across Alberta & BC**

What We Offer

Portables

Motorola R5 and R2 portables for site-wide push-to-talk communication across your crew.

Mobiles

Vehicle-mounted radios for construction equipment that keep your team connected at all times

RugGear Rugged Tablets

Purpose-built job-site devices for documentation, data, and communication in the harshest field conditions.

Private LTE

Deployable private cellular network for remote or temporary sites with no existing infrastructure.

Rentals

Flexible rental options for fixed-term projects, short builds, or teams evaluating the technology.

Push-to-Talk over Cellular

Push-to-Talk over cellular devices and accessories to keep the construction sector connected
